CATCH THE BEAT
Practical AI for Local Governments

CITY OF CASTLEGAR / CASE STUDY

From AI concepts to practical first steps

A tailored workshop gave municipal staff a foundation for exploring AI and applying tools such as Microsoft Copilot to their work.

01 STARTING POINT

Castlegar's municipal team was exploring how AI could fit into its work. Staff needed relevant examples and practical guidance to connect AI concepts with the systems and processes they use.

02 PROCESS

Daphne Thomson delivered an engaging, hands-on workshop tailored to the organization's needs. She introduced tools such as Microsoft Copilot, demonstrated real-world applications, and sparked discussion about opportunities within municipal workflows.

03 END POINT

The team gained actionable insights and a solid starting point for exploring AI solutions. Castlegar's IT manager described a strong foundation for digital transformation and expressed interest in continued collaboration as the City explores improvements.

"Her expertise and approachable style make her an ideal partner for municipalities looking to innovate and evolve."

David Bristow | Manager of Information Technology, City of Castlegar

Give your team a practical starting point with AI.

Let's talk about a workshop for your local government.
