TOWN OF HIGH LEVEL / CASE STUDY

A stronger handover. Lasting improvements.

CTB supported legislative services through organizational change, delivering digital systems and documented processes for the team taking over.

01 STARTING POINT

High Level needed continuity in legislative services while modernizing Council administration. Priorities included digital agendas, clearer records and agreement tracking, updated governance documents, privacy work and reliable follow-through on Council decisions.

02 PROCESS

CTB implemented Diligent agenda management, migrated agendas and minutes, and introduced electronic signatures. We built a digital resolution tracker with entries backdated to 2024, organized governance records, drafted bylaws and policies, and prepared a detailed operational manual for the incoming director.

03 END POINT

The Town received implemented systems, standardized workflows and handover documentation. CAO Viv Thoss credited the work with improving daily operations, transparency and accountability. Privacy assessment work and the proposed SharePoint transition remained separate next steps at reporting.

“These initiatives have significantly enhanced transparency, operational efficiency, and interdepartmental accountability.”

Viv Thoss, Chief Administrative Officer | Town of High Level
Letter of recommendation, November 9, 2025

Keep municipal work moving through change.

TOWN OF HIGH LEVEL / PRACTICAL VALUE

Less repeat administration. More capacity for the team.

~66 HOURS PER YEAR

Illustrative potential savings after adoption, not measured results

The source documents confirm the systems delivered and describe operational improvements. They do not quantify time saved. The following planning scenario uses assumed volumes and minutes saved after staff checks.

Agenda preparation	24 cycles × 2 hours saved	**48 hours**
Resolution status checks	120 checks × 10 minutes	**20 hours**
Signature administration	120 documents × 5 minutes	**10 hours**
Combined annual task savings		**78 hours**
Allowance for system upkeep	1 hour per month	**−12 hours**
Illustrative annual balance		**66 hours**

About nine staff days of 7.5 hours each.

Agenda preparation excludes the separately counted resolution checks and signature tasks. This scenario excludes initial setup, migration and training. Usage, review effort and maintenance needs will change actual savings. Staff capacity is not the same as cash or payroll savings.

A HANDOVER WITH CLEAR NEXT STEPS

The final report documents a privacy program and training materials, with the PIA underway and a future security assessment pending. SharePoint work was at the planning stage. The operational manual, staff training and incoming-director handover support continuity as the Town carries that work forward.
