**CATCH THE BEAT**
Practical AI for Local Governments

DISTRICT OF KITIMAT / CASE STUDY

# From understanding AI to putting it to work.

Practical staff training laid the foundation. The partnership now continues with work to automate the District's bank reconciliation processes.

## 01 STARTING POINT

Kitimat engaged CTB to introduce AI to staff with different levels of familiarity. The session needed to connect practical municipal applications with the privacy, security and professional responsibilities that come with using these tools.

## 02 PROCESS

Daphne delivered a structured session with a workbook, a short quiz and attendance records. Microsoft Copilot examples brought the learning to life, alongside discussion of enterprise versus free tools, content ownership, legal risks and critical thinking.

## 03 END POINT TO DATE

The District reported a better understanding of AI's opportunities and responsibilities. Its Director of Finance described the training as accessible, practical and grounded in municipal operations, and recommended CTB to other local governments.

### NOW UNDERWAY / BANK RECONCILIATION AUTOMATION

CTB is now working with Kitimat to automate bank reconciliation. This is an ongoing project; completed automation and time savings are not yet reported.

### "We would recommend Daphne Thomson without hesitation"

Sue-Lin Tarnowski, BSc., CPA | Director of Finance
District of Kitimat | Training recommendation, March 11, 2026

**Start with understanding. Build toward practical results.**
