To Whom It May Concern:

Re: Letter of Reference — Daphne Thomson, Catch the Beat AI Inc.

I am pleased to recommend Daphne Thomson, who was engaged by the District of Logan Lake to support a broad range of municipal administration, governance, communications, and technology projects.

Through a 120-hour contract, Daphne delivered an extensive body of work spanning election and assent vote communications, policy review, privacy program development, records management assessment, and process automation. She also developed municipal AI assistants, staff training resources, onboarding materials, and a comprehensive draft operations package for Meadow Creek Golf Course and Campground.

Daphne was extremely efficient, organized, and consistently quick to respond to inquiries. She approached assignments with enthusiasm and practical insight, readily incorporating feedback and translating complex administrative and technical requirements into clear, usable resources. Her ability to move between diverse projects while remaining attentive to the District's priorities was particularly valuable.

A significant strength of Daphne's work was her focus on lasting usefulness. Alongside the tools and draft documents she developed, she provided supporting manuals, reference guides, and maintenance recommendations to help staff understand and manage them. Her approach emphasized responsible AI use, privacy, human oversight, and clear accountability—important considerations in a municipal environment.

The breadth of her contribution was substantial. Her Meadow Creek work alone included a five-volume draft package containing 35 standard operating procedures, 26 forms, 13 governing policies, and three handbooks. Across the engagement, she identified matters requiring further District review and clearly distinguished draft materials and recommendations from items requiring formal approval or adoption.

Daphne was professional, approachable, and a pleasure to work with. I would confidently recommend her to organizations seeking a responsive and resourceful consultant with the ability to turn complex needs into practical solutions.

Please feel free to contact me should you require further information.

Sincerely,

Laurel Grimm
Director of Corporate Affairs
District of Logan Lake
