# *TOWN OF ROCKY MOUNTAIN HOUSE*

July 21, 2026

To Whom It May Concern,

I am pleased to write this letter of recommendation for AI Consultant Daphne Thomson and her company, Catch the Beat.

The Town of Rocky Mountian House engaged Catch The Beat to deliver in-person and virtual AI training to municipal staff. Daphne has a combination of technical knowledge, effective communication skills and genuine enthusiasm for empowering others through technology that made her the right choice for our program.

As an AI consultant, Daphne helped empower our communications team to role out our new Generative AI Policy and ameliorated our understanding and comfort with our own use of AI tools at work.

As an AI trainer she was able to translate complex concepts into practical, understandable lessons that resonate with our staff: both early adopters of Generative AI tools, and reluctant users.

Her in-person training program was engaging, accessible, and focused on real-world applications that deliver immediate value. She was able to help participants understand and leverage AI tools responsibly and effectively; she encouraged questions and helped participants talk through different scenarios and ethical uses of AI tools as they related to their specific jobs.

Her virtual training sessions were tailored to our specific needs, focusing on human responsibility and accountability as well as effective prompting. These are the key points we asked her to emphasize for all staff. She subsequently provided recordings of the virtual sessions for us to deploy as needed for onboarding new staff or refreshing our skills.

I recommend Daphne and Catch the Beat for any opportunity involving AI education, training or consulting.

Should you require any additional information, please feel free to contact me.

Sincerely,

**Laura Button**
**Communications Coordinator**
